Our Agenda

DECENTRALIZED DEMOCRACY: A BLOCKCHAIN-BASED SYSTEM FOR IMPROVING DEMOCRATIC PROCESSES

centralized systems and institutions can often be corrupt or ineffective, leading to distrust in government and its institutions, hindering democratic processes & causing poverty.

In this whitepaper,
we propose a comprehensive blockchain-based system that addresses both poverty alleviation and democratic processes.
this system utilizes digital identity, smart-chain, decentralized systems, supply chain management, e-governance, financial inclusion, remittances, microfinance and property rights to increase transparency, trust, and accessibility of blockchain.

ONE OF OUR PRIMARY OBJECTIVE IS MAKING BLOCKCHAIN TECHNOLOGY AVAILABLE TO THE MASSES

the $obd system will focus on poverty alleviation by increasing financial inclusion through blockchain-based digital financial services accessible to individuals traditionally excluded from the financial system.

community engagement & education events will be held to ensure that individuals learn how to utilize blockchain technology.

the system will be designed to be accessible to individuals regardless of their technological literacy or access to devices
the community events will be inclusive of all levels of blockchain expertise from novice to industry experts.

Tokenomics

Erik Voorhees

"I'm much more confident with crypto than with banks or fiat currency because i can actually control it, and the money supply is transparent, stated up front."

We have designed our token economics to align with market standards, in order to provide the most beneficial environment for our supporters. High taxes can limit holders' ability to move their tokens, which is why we have created token economics that prioritize the long-term interests of holders. By encouraging the usage and circulation of our token, we are able to enhance the value of our token over time. Furthermore, we are continuously monitoring the market conditions and adjust our token economics accordingly to ensure that it remains competitive and attractive for holders and investors. Additionally, our token economics also align with our overall vision and mission, which is to create a sustainable, decentralized ecosystem that benefits all participants.

Circulating supply	Token Tax	Locked liquidity
90,000,000,000,000	6%/6%	6 Months

2% LP | 2% seminars/marketing | 2% OBD dev

Why HOLD $OBIDATTI Token?

True Utility

We are building an all inclusive blockchain ecosystem, governance system and it will be powered by the $OBIDATTI Token.

Governance

The $OBIDATTI Token is community driven and is governed by the community. Holding in the holders thereby enforcing our agenda of transparency and fairness for the people and by the people.

Renounced Contract

In the spirit of transparency and security, we have made the $OBIDATTI Token contract renounced and rug pull proof.
